

Rosemania

September 2011

Naturalis L

New to Rosemania! This may be the single best product now on the market for control of thrips and other chewing insects.

Approved for use by the US EPA and may be used until the day of harvest! Contains no chemical insecticides! Minimal impact on beneficial insects. Customers in our field test found results to be excellent for control of thrips in one week. Usage is 1 to 2 tablespoons per gallon of spray. **\$99.99/Quart**

Noodlehead Sprinkler

We fell in love with this new innovative sprinkler the first time we used it at Rosemania. We know you will too. A great way to concentrate the water right where it is needed.

\$14.95

High performance (85psi) Shurflo Pump designed for heavy-duty spraying applications. This pump has Viton valves and a Santoprene diaphragm compatible with most present day horticultural chemicals.

7 gallon high density tank with graduation marks by the gallon; Extra tanks available and easily interchangeable; Sealed 12-volt lead-acid type rechargeable battery complete with battery Charger included; Spotshot's polypropylene spray gun with lockable trigger; The standard version comes with a 30 foot hose and 24 inch wand. The **Special Rosemania Version** comes with an longer 30" wand and 50 feet of hose! An adjustable nozzle and a tee-jet flat spray nozzle are included in both models. Industrial-type 8" wheels with tires mounted on "no rust" high impact polypropylene wheels.

Standard Version \$399.95

Special Rosemania Version \$439.95

Shuttle Miticide

These days, ornamental growers face a tough challenge: How to achieve effective control of spider mites while managing the continual threat of mite resistance. But now there's a product that can help you in both regards - **Shuttle "O" Miticide**

from Arysta LifeScience North America.

When applied according to label directions, **Shuttle** delivers rapid knockdown and outstanding residual control of twospotted spider mite (*Tetranychus urticae*) and spruce spider mite (*Oligonychus ununguis*). That's because **Shuttle** destroys damaging mites at every life stage, from eggs to adults. **Shuttle Miticide** also features a unique active ingredient with no known cross-resistance, making it the ideal choice for managing mite resistance. In addition, it's safe on predacious mites and other beneficial species

\$169.99 - pint

Mancozeb & Pentathlon

Mancozeb and Pentathlon contain the only chemical we know to kill the blackspot spore. If you already have the blackspot fungus, your regular preventative like **Banner Maxx**, **Cleary's**, **Funginex**, **Immunox**, or **Compass** won't be effective. Mix **Mancozeb** or **Pentathlon** at a rate of 1 tablespoon per gallon of spray material. Spray every three days for three or four spray intervals and your blackspot should be under control. At that time you can go back to your regular preventative program. Mancozeb comes as an easy-to-dissolve liquid. Pentathlon DF is more practically priced as a powder for large gardens. Pentathlon LF (liquid formula) is intended for large gardens or commercial growers.

Mancozeb (pt) \$24.99

Pentathlon DF (6 lb) \$47.99

Pentathlon LF(2.5 gallon)

\$136.99

Banner Maxx - \$69.99 (pint)

Tired of spraying every week? Banner Maxx has become our best selling preventative fungicide and for good reason.. it is very effective with a 14 day spray interval.

For best results, alternate with **Compass**. If you need a more economical alternative, spray your first rotation with Banner Maxx mixed with Pentathlon DF or Mancozeb. After 14 days, use Banner Maxx alone and continue to repeat this process throughout the growing season. Usage is 1/3 - 2/3 teaspoon/gallon. **\$69.99 (new lower price)**

Floramite SC - \$295.00 (quart)

Now this fantastic miticide/ovicide is available in a soluble concentrate. **Floramite SC** is a selective miticide that provides outstanding control of mite pests on ornamental plants. Floramite produces quick knockdown through contact activity and long residual control of more than 21 days. It is effective on a variety of species of mites and all life stages of Tetranychid spider mites. (Yes, this means it kills the eggs!) And because of its novel mode of action and selective nature, Usage is 1/4 to 1/2 teaspoon per gallon of spray. This is one of the best on the market!

Conserve SC - \$156.00 (quart)

Recent studies on thrip control have revealed the effectiveness of Conserve, a spinosad insecticide. Spinosad is derived from a soil dwelling bacteria. Studies at Ohio State University found that Conserve was significantly better than Orthene at controlling thrips while retaining high numbers of beneficial insects. Conserve also works great for control of bud worms, bag worms, fall webworms, gypsy moth, and spruce budworms. Usage is 1/3 teaspoon per gallon)

Longnecker Garden Tools - NEW!

Longnecker Trowel - \$26.95

Longnecker Weeder - \$26.95

Combo (Both!) - \$49.99

Forbid Miticide/Ovicide

Forbid offers outstanding knockdown and residual control of mites and whiteflies. The active ingredient in *Forbid*, spiromesifen, represents a new class of chemistry from Bayer Environmental Science, called the tetramic acids. Thanks to its novel mode of action, foliar-applied *Forbid* offers growers an effective tool for management of mites resistant to conventional products. It features translaminar activity, controlling mites on both sides of leaves, and has activity from egg through adult life stages (*This means you can spray the top of the leaves and Forbid will still kill mites on the underside!*) Usage is only 1/8 to 1/4 teaspoons per gallon of spray solution.

\$289.99 - 8oz

Limestone F

The fast, safe and easy way to raise the pH of your soil. Liquid Formula. See our website for complete information and for application instruction.

Orthene 97%

We are happy to offer *Orthene 97%* labeled for ornamentals. *Orthene 97%* comes in a easily dissolvable granule instead of a fine powder, giving all the benefits of *Orthene 75%*, without the offensive odor. In our opinion, this also makes for a safer product as dust seems to be greatly reduced. *Orthene* has a proven track record as a reliable pesticide for aphids, thrips and other common insects. With the new higher concentration of active ingredient, it only requires 3/4 tsp. per gallon of spray solution.

\$31.99 (.773 lb)

Merit

Bayer - Purcell brings us the latest secret weapon for aphids and Japanese Beetles. We originally used this product to control aphids that had become resistant to *Orthene*. Wow, does it really work! The big bonus was how effective it was on Japanese Beetles. The recommended application rate for roses is 1/8 teaspoon per gallon of spray solution applied every other week.

Nitril Disposable Gloves

When it comes to hand protection from pesticides, the best glove money can buy is constructed of Nitril. Here is a quote from the Virginia Tech Pesticide Program. "*You should never handle a pesticide without using a pair of unlined chemical resistant gloves....Look for gloves made of nitrile or neoprene....*". Our Nitril disposable gloves make it especially easy to handle measuring-spoons during mixing where the chemicals are at their most concentrated form. A box of 100 gloves will last most users 2 years.

\$21.99
Box of 100

Indicate 5

Indicate 5 is the choice of expert growers across North America for getting the most out of their spray programs. Years of testing have proven that pesticides are more effective and last longer when mixed and sprayed in a 4.5 to 5.5 pH solution. No pH strips are needed as Indicate 5 will turn the water a light pink color when the correct amount has been added. Usage varies, but ranges between 1 teaspoon and 1 tablespoon per gallon of spray solution. Indicate 5 also contains a great surfactant (spreader/sticker) to evenly distribute the spray across the leaves and stems. Available in quart and gallon sizes.

24.99 (quart)
\$51.99 (gallon)

Dual Cartridge Respirator

This dual cartridge respirator is the perfect tool for being certain that you are not breathing harmful chemicals. We highly recommend every rose grower wear a pesticide respirator when spraying any type of pesticide. We are very pleased with the comfort of this mask along with the heavy duty elastic used in the construction of the straps.

**Remember, if you can
smell the chemical,
you are breathing it!**

\$35.99

Steel Markers

Our steel markers are durable and easy to use. Comes as a set of 25 markers and EACH SET INCLUDES A CARBON MARKING PENCIL AT NO CHARGE!

\$22.00

Kneelons!

Kneelons are made from extremely flexible Neoprene over a durable, waterproof pad. Kneelons are easier to use than a kneeling pad, thanks to stretchable, secure straps. Wear

Kneelons comfortably, for hours at a time, over pants or right against the skin. Easy-care machine washable. One size adjusts to fit most.

\$34.00 pair

Hudson Never-Pump Sprayer

*Great for small gardens and
spraying herbicides.*

This 4 gallon backpack sprayer comes complete with battery charger and several wand attachments. **The battery life lasts up to 10 hours on a single charge!**

Chrysal Pro 2

For years we have been recommending the use of Chrysal Pro 1 (RVB) with the Chrysal "Clear" Sachets or Liquid. The reason is this: RVB (Pro 1) is a hydration solution. It allows the cut flowers to "drink" maximum water keeping stems and petals turgid (stiff). This promotes "holding" and eliminates the "bent neck syndrome". The Chrysal "Clear" product contains sugars specially designed for feeding roses and other cut flowers. Now we are now proud to introduce **Chrysal Professional 2** the perfect combination of **RVB** and **Chrysal Clear** for exhibitors or anyone who wants long-lasting flowers. Keeps the water clean, clear and odorless. Usage is 2 teaspoons per quart. A gallon concentrate will make 96 gallons of finished product. (A handy pump is sold separately or in combination with each gallon.)

\$69.99 gallon - Product only

\$12.00 - Pump Only

\$79.00 - Pump & Pro 2

West County Rose Gloves

Thorn-proof, lightweight and flexible, the new West County Gardener Rose Glove is worlds apart from bulky rose gloves of the past. Made with unique 100% synthetic suede, they're tough enough to keep thorns out, but supple enough for delicate tasks. Our new Rose Glove features durable, puncture-resistant synthetic suede, padded palms and reinforced finger pads to protect against sharp thorns, prickly stems or abrasive logs. The extended elbow-length gauntlet shields forearms and protects against snagged sleeves. Gauntlet openings are large, making for better air circulation, less perspiration build-up and a more comfortable fit. Tops of hands and forearms stay cool and flexible too.

Only \$34.50 per pair!

Sizes:
xsmall

xlarge

Customers Note: Please DO NOT spray fungicides, insecticides, or miticides without proper protective gear. This includes a respirator, goggles and chemical resistant gloves at a minimum. You should also take proper precaution to cover your arms and legs with either long pants and long sleeve shirt, or with a chemical resistant suit such as Tyvek.

Eagle 20 EW (pint)

For years, rosarians have preferred the chemical, "systhane," as the product of choice for killing and preventing powdery mildew. Unfortunately, the product was previously packaged only in a powder form and for a hefty price of more than \$125. Now Rosemania has Systhane in a new liquid formula called **Eagle 20EW**. Usage is only 1/3 to 2/3 of one teaspoon per gallon. At \$69.99 per pint, this product is now a bargain and an obvious choice to eliminate and prevent powdery mildew.

\$69.99

Bloomsaver

Designed for the flower gardener to facilitate the gathering and proper conditioning of flowers. This handy tool enables the gardener to collect dozens of roses at leisure, while protecting them from wilting, crushing and bruising. The Bloomsaver is a handsome tool designed to endure years of use.

Easy to carry and extremely stable.

Now Only \$34.99

Clearex Salt Leaching Solution

Clearex® is an isotonic drenching solution that unlocks the ionic bond between the nutrient and the soil, correcting the problem of nutrient salt toxicity and lockout, allowing plants to excel again. Soil containers and gardens use 1 tablespoon of Clearex per gallon of water. Pour one gallon around the drip line of each plant. Wait 24 hours and then water and fertilize as usual. This is a wonderful product for anyone who wants to control salt buildup in their soil. A must have for exhibitors and for those who grow plants in containers!

\$22.99 - quart
\$42.00 - gallon

New AzaMax

....a safe and effective insecticide /miticide made from neem. No oil! **This is the best insecticide we have used lately for control of thrips.**

AzaMax is a natural product with a broad spectrum of pest control and broad plant applications. AzaMax is made from special Azadirachtin Technical extracted using patented extraction technology from Neem, a tree known for it's innumerable benefits. AzaMax contains Azadirachtin A&B as active ingredients and more than 100 limonoids from it's special technology. The special feature of AzaMax is that it does not use hard chemical solvents and uses food grade formulation ingredients. AzaMax is licensed in all 50 states.

Kelway HB-2

Professional pH Tester

HB-2

Check your soil anywhere in only 3 minutes! The Kelway professional direct pH soil tester is used by thousands of nurseries across the world. When inserted

into moist soil, the HB-2 registers the degree of acidity on the upper scale. When the button is depressed, the lower scale shows the degree of moisture (% saturation). Comes with a handy carrying case with belt loop and complete instructions including a guide for changing soil pH. Extremely accurate to (+/- .2). Very durable. No batteries required.

\$137.99

Kelway pHD

A new, less expensive model made for the small gardener but with the same accuracy as the HB-2.

Only \$73.00

Customers: We now have a generic version of the HB-2 for less than \$90.00! See our website for details!

Mills Products

Mills Magic Rose Mix is a 100% natural product formulated and developed by rose expert, Ted Mills. Champion rose growers all over North America are using this product with incredible success. We recommend 2 cups around the drip line of your bushes in the spring and 2 more cups per bush in the late summer.

EasyFeed is an accelerated flowering formula. This premier product provides abundant growth-producing nutrients from both organic and nonorganic sources. EasyFeed is a unique product that includes Epsom Salts, Sequestrene Chelated Iron, Soluble Seaweed Extract, Fish Solubles, Urea and other soluble fertilizers. Mixes easily with water.

Bloomkote Time Released Fertilizer

From the makers of **Mills Magic Mix** and **Mills EasyFeed!** Not only does Bloomkote deliver the right amount of nitrogen, phosphorous and potassium needed for your prized roses, it also has the micronutrients needed to make your roses all they can be. While we still recommend the use of liquid fertilizers, **Bloomkote** is the perfect product for those with limited time or for ensuring your roses have the constant source of nitrogen and micronutrients they need to thrive. Bloomkote is released in small amounts into the soil each time you water, or when it rains. It can be added directly to new planting holes without fear of burning the roots. Feeds continuously for 4 months! We recommend 1/2 to 1 cup per rose bush. Simply blend well with soil of newly planted roses or sprinkle around the drip line of established bushes and lightly scratch into the soil.

15# Plastic Bag \$39.99 40# Pail \$89.00

Bionic Rose Gloves

Flexible goatskin leather with reinforced padding on palm, thumb and fingers means you cannot feel thorns while working with the thorniest bushes. However, you can "feel" what you are doing and will not have to remove these gloves to do fine work. Your hands will feel the difference in the technology after only one wearing.

\$42.00 per pair. 2 or more \$37.00 each.

Actinovate

Actinovate® SP is a high concentration of a patented beneficial bacterium in a 100% water soluble powder. Because of the special properties of the Actinovate® microbe, plants treated will be vigorous, have increased vitality and have much better root growth. Not only does it suppress a wide range of soil borne diseases, it also works as a spray for Downey Mildew, Powdery Mildew and Botrytis.

18 oz. - \$109.00 2 oz. - \$27.00

Actino - Iron

Same beneficial bacterium contained in **Actinovate**.

Actino-Iron®, however, is much more than a fungicide. **Actino-Iron®** contains slow release iron that provides long lasting greening to your plants without fear of burning (even the most iron sensitive varieties). In addition the humic acid in Actino-Iron® is used as a food source by the microbe and works in conjunction with it in producing robust, healthy roots and vigorous plant top growth. Disease suppression, long-term greening, robust root growth, larger plants and increased production: You can't afford to plant without Actino-Iron®!

3 lb. - \$28.00

Visit our website for complete information on both of these wonderful new products.

Mykos (mycorrhizae)

Mykos is a highly-beneficial soil fungus which, once applied to plant roots, lives for the life of that particular plant. When Mykos fungi colonize a "host" plant's root system, it spreads out thin fungal filaments called "hyphae" from the root surface into the surrounding soil. These hyphae spread out far beyond the reach of the root hairs and access vastly-larger amounts of soil (up to a thousand times more), retrieving otherwise inaccessible stockpiles of nutrients and water. This nutrient "super-mining" effect, is one reason why a partnership between Mykos and plants so highly-beneficial. Mykos greatly increases plants' ability to absorb and compete for precious soil nutrients. **Mykos will deliver superior nutrient management, faster growth, increased disease suppression and pest resistance, increased drought resist-**

ance and improved soil texture. We recommend 2 teaspoons per bush in the planting hole or mixed with one gallon of water for existing plants.

\$28.99

Enough for approx. 45 plants

EZ-Flo Automatic Fertilizing System

Now you can save time and money while enjoying great results with your fertilizing program. The E-Z Flo connects to your hose with an "E-Z Connection" that is included with each order. Simply fill your E-Z Flo tank with water soluble fertilizer, set your desired mixing ratio, and start fertilizing your roses, lawn or other garden plants.

EZ-Flo 0.75 gallon - \$65.00

EZ-Flo 1.3 gallon - \$79.00

EZ-Flo 3 gallon - \$91.00

Liquid Karma

Liquid Karma contains a full complement of metabolically active organic compounds not found in regular plant foods or supplements. These unique compounds are absorbed immediately and act as regulatory signals, activators or catalysts to produce synchronized and accelerated growth under all conditions. Liquid Karma functions as a growth engine because its high metabolic activity produces a large amount of energy which is immediately transformed to growth. Usage is from 1 teaspoon to 1 tablespoon per gallon. Liquid Karma is not a fertilizer and should be used in addition to your regular fertilizing program.

Quart-\$33.99

Gallon-\$76.00

Nature's Nog

For years we have known the benefit of seaweed and humates. *Nature's NOG* brings together these two most effective, naturally occurring plant growth stimulants known to soil science. The result is a carefully balanced formulation, which is more effective as a combination of ingredients than any of its parts alone. *Nature's NOG* is a totally organic, natural compound designed to enhance root formation, increase vascular strength, promote green color, and reduce stress on ornamental and agricultural plants. *Nature's NOG* is environmentally safe and completely non-toxic to humans, animals and fish. So why does it work? Seaweed provides the growth hormones while humate provides the soil conditioners and stimulates microbial activity. I like to use this product in my regular preventative spray program. The first time you use *Nature's NOG*, add 2 oz. of product per gallon of spray solution. On all subsequent treatments, use 1 oz. per gallon.
